Momentus Secures Contract to Host OQ Technology 5G Payload on Vigoride-9 Mission

November 3, 2026

Commercial deployment will expand global satellite-based IoT connectivity for international customers

SAN JOSE, Calif.--(BUSINESS WIRE)--Nov. 3, 2026-- Momentus Inc. (NASDAQ: MNTS) (“Momentus” or the “Company”), a U.S. commercial space company specializing in satellite technology, space transportation, and in-orbit services, today announced that OQ Technology has selected Momentus to fly its 5G Narrowband Internet of Things (NB-IoT) payload on the Company’s Vigoride-9 mission, scheduled for launch in Q4 2027.

"Diverse hosted payload missions continue to demonstrate the versatility of our Vigoride platform and our ability to support innovative commercial space applications," said John Rood, Chief Executive Officer of Momentus. "We look forward to working with OQ Technology as it expands its operational satellite communications network and delivers enhanced connectivity capabilities to customers around the world."

The mission will support the continued expansion of OQ Technology's operational 5G NB-IoT satellite constellation, increasing network capacity and enhancing global service coverage for commercial and government customers worldwide. Once in orbit, the payload will communicate directly with user terminals around the globe, providing satellite-enabled connectivity services to international customers across industries requiring reliable, ubiquitous IoT communications.

The hosted payload consists of an antenna, feeder board, and payload electronics integrated aboard the Vigoride orbital service vehicle. The payload is expected to provide services over a multi-month operational mission following deployment.

The Vigoride-9 mission represents another example of how hosted payload architectures can provide a cost-effective and flexible path to orbit for commercial operators seeking to deploy operational capabilities without developing and launching dedicated spacecraft.

About Momentus

Momentus is a U.S. commercial space company offering satellites, satellite components, in-space transportation and infrastructure capabilities. Through its Vigoride orbital service vehicle, the Company also delivers hosted payload support, last-mile delivery, and servicing capabilities tailored to scalable mission architectures that are utilized by commercial customers in the United States and internationally, as well as by U.S. Government organizations such as NASA, the Department of War/Defense, and the U.S. Space Force.

About OQ Technology

OQ Technology is a global satellite telecommunications company providing direct-to-device 5G NB-IoT connectivity from space. The company is focused on delivering satellite communications services that connect industrial assets, infrastructure, logistics networks, and remote operations worldwide through standards-based IoT technology.

Forward-Looking Statement

This press release contains certain statements which may constitute “forward-looking statements” for purposes of the federal securities laws. Forward-looking statements include, but are not limited to, statements regarding the expected filing of the Company’s Form 10-K and Form 10-Q and its management team’s expectations, hopes, beliefs, intentions or strategies regarding the future, projections, forecasts or other characterizations of future events or circumstances, including any underlying assumptions, and are not guarantees of future performance. Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict and many of which are outside of Momentus’ control. Many factors could cause actual future events to differ materially from the forward-looking statements in this press release, including but not limited to risks and uncertainties included under the heading “Risk Factors” in the Annual Report on Form 10-K filed by the Company on March 31, 2026, as such factors may be updated from time to time in our other filings with the Commission, accessible on the Commission’s website at www.sec.gov and the Investor Relations section of our website at investors.momentus.space. Forward-looking statements speak only as of the date they are made. Readers are cautioned not to put undue reliance on forward-looking statements, and, except as required by law, the Company assumes no obligation and does not intend to update or revise these forward-looking statements, whether as a result of new information, future events, or otherwise.
